On-street Bikeways

Recommended bike routes within the street pavement designated based on novice rider's comfort level and ease of use.

Comfortable
Routes with low vehicle volume and lower speeds, generally residential, or streets with wide lanes. These routes may be designated with signs, marked bike lanes, or shared lanes.

Moderate
Routes with low to moderate traffic volumes and speeds with varying lane width. May include bike lanes or wide shoulders on higher volume roads.

Difficult
Routes with higher vehicular speeds and/or volume, combined with narrow lane widths or busy intersections. Use caution in these areas.

Shared Use Paved Trail

10 or 12 foot wide paved surface separate from the streets. High comfort level and ease of use.

Razorback Regional Greenway

Single Track Mountain Bike Trail

Approximately 5 foot wide natural surface trails. Not suitable for all weather conditions.

Steep Grades

Arrow Points Uphill Direction and does not designate direction of travel. Frequency roughly indicates steepness of grade.
