On-street Bikeways
Recommended bike routes within the street pavement designated based on no-vehicle rider’s comfort level and ease of use.

Comfortable
Routes with low vehicle volume and slower speeds, generally residential, or streets with side lanes. These routes may be designated with signs, marked bike lanes, or shared lanes.

Moderate
Routes with low to moderate traffic volume and/or speeds with varying lane width. May include bike lanes or side streets on higher volume roads.

Difficult
Routes with faster vehicular speeds and/or volume, combined with narrow lane widths or busy intersections. Use caution in these areas.

Shared Use Paved Trail
10 or 15 foot wide paved surface separate from the streets. High comfort level and ease of use. 10 or 15 foot wide paved surface with year of expected completion.

Razorback Regional Greenway

Single Track Mountain Bike & Hiking Trail
Approximately 3 foot wide natural surface trail. Not suitable for all-weather conditions; please do not ride on wet trails, doing so may damage the trail.

Steep Grades
A small arrow points up/down direction and does not designate direction of travel. Frequency roughly indicates steepness of grade.
